*Investments for project realization – over 5 billion RUR.*

Phonica Plaster Ltd. owns one of world's largest raw gypsum mine in Europe

- qualified and involved staff
- automated production line
- own gas piston power plant

- reliable suppliers
- highest quality chemicals
- low emission during production

## Factory consist of:

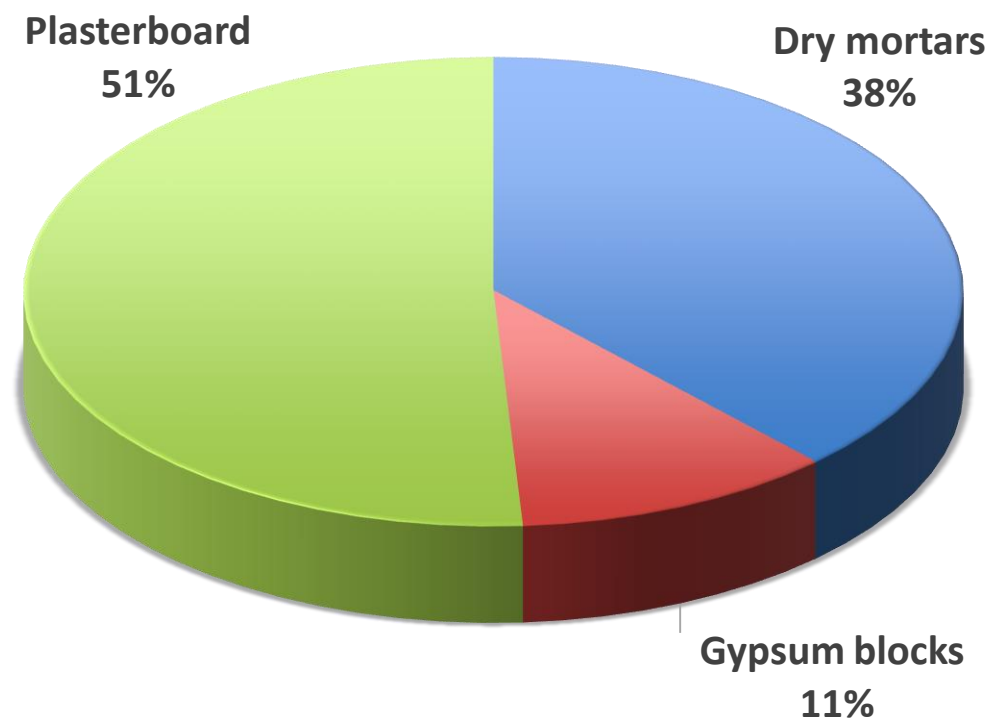

- Underground gypsum mine
- Limestone quarry
- Own power station
- Research and Development lab
- Technological lines for processing of raw materials and the production of gypsum building materials.

## Monthly production capacity:

Plasterboard: 1 125 000 m<sup>2</sup>  
Gypsum blocks: 30 000 m<sup>2</sup>  
Dry Mortars: 10 000 tons

## Sales shares in quantity, 2015

Professional qualification trainings

Accommodation and transportation

Social benefit packages

All dry mortars are available in pack 1, 5, 15 and 25 kg.  
*Factory is equipped to fill up silos.*

**Hand applied plaster A1**

**Gypsum-based polymer spackling paste R70**

**Marble-based polymer spackling paste R90**

**Finishing gypsum spackling paste S3**

**Machine applied plaster M35 and M50**

**Self leveling floor compound N100**

**Adhesive for gypsum blocks and plasterboards K2**

**Durable universal gypsum spackling paste S8**
